

COMMUNICATION PORTS IN A DATA DRIVEN ARCHITECTURE

Abstract

5 In an embodiment, an apparatus includes a first processor having a first processor element and at least one input/output (I/O) port within a first port ring. The apparatus also includes a second processor having a second processor element and at least one I/O port within a second port ring, wherein the second processor is coupled to the first processor through at least one I/O port of a third port ring of a third processor.
